The 2015-2016 Edition of the *NECA Manual of Labor Units* is now available!

An estimate is only as good as the information it is based on, and the *NECA MLU* has been the estimating resource of choice for electrical contractors since 1923. The *Manual* provides an experience-based reference for estimating the electrical construction labor required to install typical electrical and communications systems. The labor unit data comes directly from a national average of NECA's member contractors and is reviewed and updated bi-annually to ensure you have the best information to accurately estimate.

Learn more about the new *MLU* at [www.necanet.org/MLU](http://www.necanet.org/MLU).

Requests for complimentary copies must be received by November 15, 2015!
